## Optelian Network Manager

The Optelian Network Manager (ONM) provides complete network and element management for Optelian products, services, systems, and solutions. Its multi-layer capabilities address all management functions throughout the network, from a centralized site. ONM makes service delivery, configuration, monitoring, and troubleshooting fast and simple.

### Features

- Intuitive point-and-click GUI
- Multi-layered, end-to-end, local and remote network management
- Full topology awareness and auto-discovery of network elements
- Comprehensive OAM capabilities
- Performance monitoring of network elements and services
- Alarm and event configuration and management
- User and security administration
- Node and network software upgrades
- Node and ONM backup and restore GUI

The ONM client-server solution provides network operations, administration, and management within a secure and customizable user environment. The ONM delivers a complete and robust solution to manage your network. Its one-screen approach enables fast and complete configuration of Layer 1 and 2 service cards, as well as enabling transport connectivity across Optelian products in the network.

## Capabilities

Network element support	100
Simultaneous user support	15
Supported platforms	OMS-7190, OMS-2190, MPX-9110, OMS-719, OMS-519, OMS-219
Network and node auto-discovery	
Network element graphical and tree views	
Network element configuration	
Performance monitoring L0/L1/L2	
Alarm and event management	
Customization of views and background network maps	
Network and node software upgrade	
ONM and node backup and restore	
Network audit	
Integrated email notification	
User and security administration	

## Specifications

Operating system	Recommended client and server configuration
Windows 7 Windows 8 Windows 2008 Server Windows 2012 Server	<b>Client:</b> 2.8 GHz Intel Core i5 processor or equivalent, 4 GB of RAM <b>Server:</b> 3.2 GHz Intel Core i7 processor or equivalent, 8 GB of RAM
Solaris 10	<b>Client:</b> Sun UltraSPARC, 4 GB of RAM <b>Server:</b> Sun UltraSPARC, 8 GB of RAM
